

Identify the parts of a plant

Say what each part does

My flower picture

Instructions:

Cut out the parts below and paste them on the sheet to make a flower.

Cut out and stick each label by the correct part of the plant and then find the correct description of what that part does.

roots

stem

seeds

leaves

petal

Attracts insects and birds.

Grow into new plants when they fall

Takes in water and nutrients from
the soil.

Holds the plant up.

Catches sunlight to make energy.
