

1 Here are two angles.

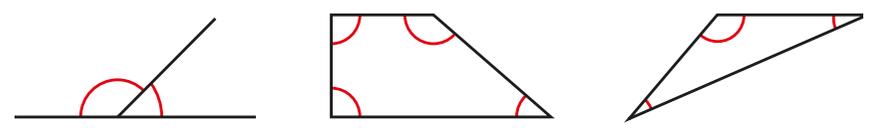

- a) Which angle is obtuse?
 - b) Which angle is acute?
- How do you know?

2 Here are two angles.

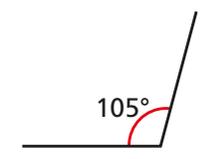

- a) What type of angle is angle X?
 - b) What type of angle is angle Y?
 - c) Which angle is smaller?
- How do you know?

3 Which is the greatest angle in each diagram?

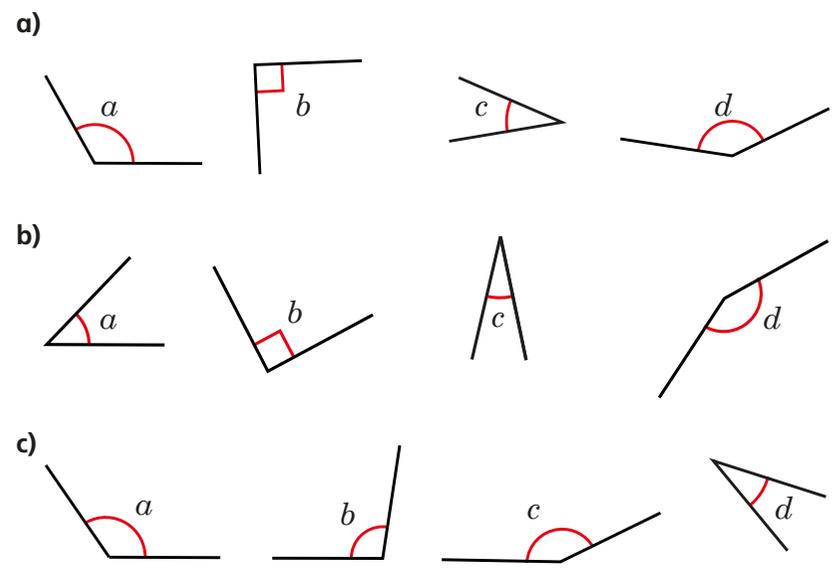

4 Here is an angle.

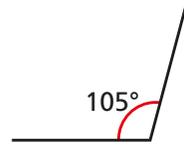

- a) Draw a smaller angle than 105° on the left.
- b) Draw a greater angle than 105° on the right.
- c) Is this statement true or false?
The angles are in ascending order of size.
Explain your answer.

5 Order the angles from greatest to smallest.

4 Here is an angle.

- Draw a smaller angle than 105° on the left.
- Draw a greater angle than 105° on the right.
- Is this statement true or false?

The angles are in ascending order of size.
Explain your answer.

5 Order the angles from greatest to smallest.

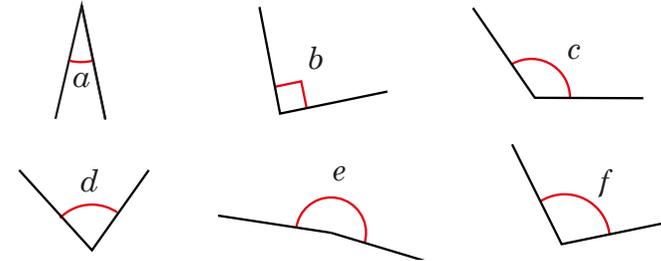

a)

b)

c)

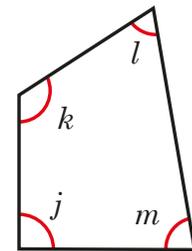

6 Compare and order the angles from smallest to greatest.

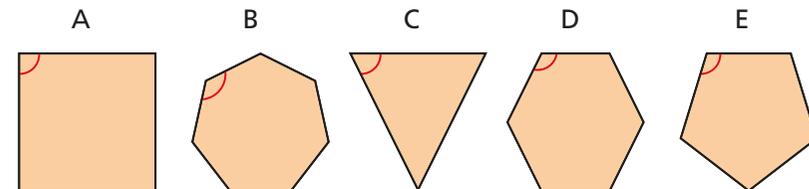

7 Four angles are labelled in the quadrilateral.

- Which of the angles are acute angles?
- Which of the angles are obtuse angles?
- Write the angles in order of size, starting with the smallest.

8 An interior angle is marked in each polygon.

Order the interior angles of the polygons from smallest to greatest.

What do you notice about the number of sides a polygon has and the size of its interior angle?
